Imack Coffee

About Us

IMACK Coffee is a family owned and operated wholesale coffee roaster specializing in helping your coffee business grow. Founded in 2003, IMACK is derived from the names of each member of our family: Isaiah, Matthew, Ana and Carl Kosinski. It is a fact that IMACK will only grow as our customers grow. This is our mindset and we base our company on the success of our customers. IMACK offers exceptional customer service as well as an extensive list of the finest products with excellent competitive pricing. IMACK is a one stop shop for all your Specialty Coffee Business!

Commitment to Quality

All IMACK's coffees are roasted to each customers' order while maintaining the tradition of small batch roasting. We roast all coffee to the level at which we believe brings out the bean's unique characteristics and true flavor. Since we roast to order we are always willing to roast to our customer's specific taste and requirements. IMACK invites you to sample some of the finest specialty coffee available.

Sustainability

Many companies are trying to reduce their carbon footprint. At IMACK, we feel we have done a great job! We have reduced our waste to a couple of biodegradable bags per month. Those bags are mainly floor sweepings consisting of sand and dust. Here are a few simple steps we follow:

Burlap Coffee Bags: Recycled and repurposed.

Eco-Friendly Packaging: Our coffee bags are recyclable and some are biodegradable.

Paper: Reused and recycled. Washable cloth towels are used in place of paper.

Ink & Toner: Recycled.

Boxes: Reused until no longer good then recycled.

Pallets: Reused and given to individuals supporting their families by repairing them and selling to companies that will reuse them creating a cycle that benefits everyone.

Shrink Wrap, Plastic & Glass: The plastic film that all pallets are wrapped - recycled.

Coffee Grinds: Composted.

Chaff: The skin from green coffee beans left behind during the roasting process - composted.

Pollution Prevention: We believe in using a thermal oxidizer afterburner. This unit takes the harmful smoke from the roaster and makes it clean.

Giving Back

Like any small business, we have gone through our ups and downs (and still do). We started this venture when our 1st son, Isaiah, was born. Looking back, not such a good idea. We have no family in Colorado, it was only Ana and I. We started out of our garage while working full time. With the help of our customers, the business took off. We out grew the garage, our 1st warehouse and, with the help of our loyal customers, we purchased our current facility. This being said, we feel we have a responsibility to our community. IMACK donates to several food banks, shelters and other charitable organizations. We participate in fundraisers, as well as school and church organizations.

Why Imack Coffee...

Our Beans are Collectively Sourced

Imack imports green coffee beans from over 20 countries. Our buyers expertise ranges from applying sustainable growing practices to milling. We choose to work with cooperatives, small and single holder farms. Which are noted for their profound commitment to conserving the health of the environment, managing waste, building schools, and their conscious consumption of natural resources.

Our Beans are Stored in Green Rooms

We all know Colorado is a dry climate. Coffee has a moisture content that when dried, changes the characteristics and roast profiles. Unlike most roasters, Imack does not store a lot of green coffee in our facility. With climate controlled warehouses "Green Rooms" there is no need. Humidity levels are kept below 65%. We pull our inventory on a weekly basis ensuring our coffee is at its peak freshness.

Slow Roasted in the Tradition of Small Batch Roasting

We roast our beans in the Mile-High City. This gives us a natural edge. In high altitude areas it takes longer to bake and cook, which means it also takes longer to roast a batch of coffee. Here at Imack, we do not alter the natural process by increasing heat to meet time goals. Our goal is to make the best cup of coffee. We slow roast to bring out the beans unique characteristics and true flavor. As a result our coffees offer a smooth and natural cup that you can taste the difference.

Freshness is Key

Everything we do is to bring you a coffee unlike any other. So why store it? We don't. It is delivered to you within a day or two of being roasted.

Which Coffee Is Right For You?

Lets start with the basics. They are Aroma, Acidity, Body, Complexity, and Finish.

Aroma

Coffee aroma is the fragrance of coffee. From grind to brew, how it smells to you. Typical coffee aromas include flowery, fruity, herby, nutty, chocolaty, spicy... Aroma peaks in intensity with medium roasts.

Acidity

Often misunderstood, neither acidic or sour. It has nothing to do with the amount of acid or pH. An acidity coffee has a brisk, bright, tangy, fruity, or wine-like flavor characteristics. They are found in many high grown Arabica coffees. The darker the roast the less acidic it becomes.

Body

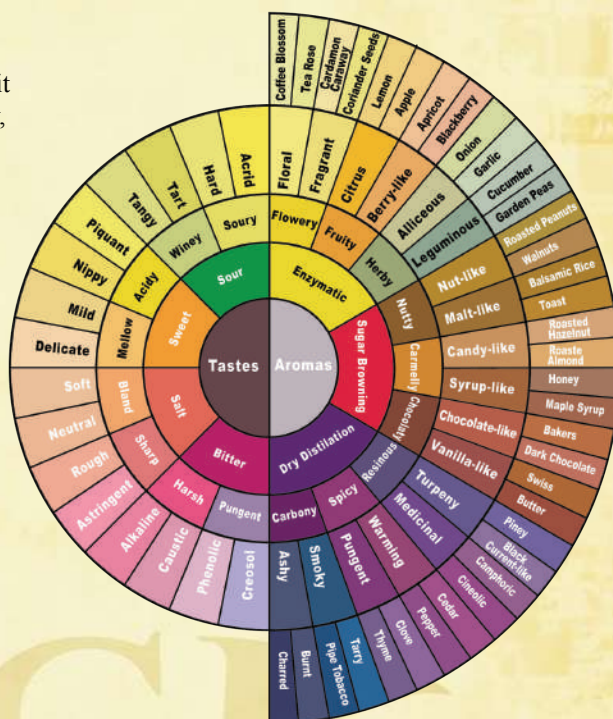

Body is how the coffee feels in your mouth. It is the physical mouth feel and texture of the coffee. It is a sensation. Does it feel heavy, light, buttery, gritty, smooth, thin, strong, watery... Medium to dark roasts have increased bodies but with very dark roast the body decreases and becomes thin.

Complexity

Often experienced with our blends. Complexity is the existence of many sensations. It is a array of flavors existing together like acidity and sweetness, chocolate with hints of berry. Our espresso is designed to increase complexity. Complexity peaks at medium roasts.

Finish

This is the lingering sensations after the coffee has been swallowed. They can be chocolaty, short, spicy, floral, tangy, sweet, clean, etc.

Light, Medium or Dark?

Coffee is complex, lets not complicate the roast names. They all fall into a light, medium, or dark roast category. As your coffee knowledge progresses you can get more into the terminology.

Light Roast Coffees (City Roast)

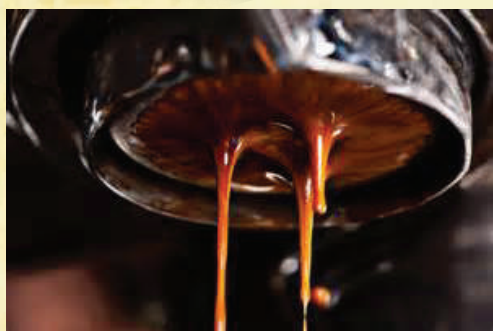

Light brown in color, oils do not appear. They have more acidity. You are able to identify the character distinctions of the coffee most clearly.

Medium Roast Coffees (Full City)

Medium roasts are the American norm. A medium brown, less acidity and more body. You can start to taste some of the roasting. More nutty, caramelly, & chocolaty.

Dark Roast Coffees

Here we have Dark, French, and Italian. Oils are abundant. In darks, we have nice bodies and intense flavors. In French roasts, bodies are thin but have rich and hearty flavors. Our Italian is the darkest with strong earthy smoke flavors.

Imack Blends

Imack Espresso

Our best espresso! 100% Arabica Beans, dark roasted, strong, smooth, full bodied with lots of crema. Complex flavors make this an excellent choice.

Espresso Medium

A medium roasted harmony of South American and Indonesian Coffee. Smooth and full of body with lots of flavor.

Espresso Double Shot Pods

Individual nitrogen-flushed packets ensure optimum freshness for each and every brew. Pre-ground, pre-tamped, and measured to the perfect proportion. The grounds are packed in between two pieces of filter paper so that you can simply toss the pod into your espresso machine to brew. These pre-measured pods ensure a consistent serving size and espresso concentration with every shot.

Breakfast Blend

This medium roast is brightly acidic, smooth, balanced and rich in flavor with hints of smokiness. A great start to your day.

Matthew's Blend (Light House Blend)

We are not big on fancy blend names, just great coffee. Since we are a family company, why not? M in IMACK is for Matthew. He is just like this blend, bright and full of character. A great coffee for those who prefer their coffee on the lighter side.

Isaiah's Blend (Medium-Dark House Blend)

If you do for one, you have to do for the other. A real crowd pleaser! Medium to dark roasted. Smooth and clean, yet a full-bodied rich flavor.

Midnight Sun

The combination of dark roasted South American and light roasted Indonesian, creates a blend that is just as visually appealing as it is delicious. Full body and sweetness are complemented with hints of smokiness.

Mocha Java

This traditional blend combines the smooth body of Indonesian coffee with the wild fruit notes of coffee from the Red Sea region. Our Mocha Java is roasted on the darker side.

French Roast

This very dark roast is made from a blend of premium Arabica beans. This coffee is rich and hearty with an intense smooth flavor.

Italian Roast

Our darkest roast! This classic Italian Roast is strong, rich, and earthy. This blend combines the finest South American and Indonesian coffee beans.

Central America

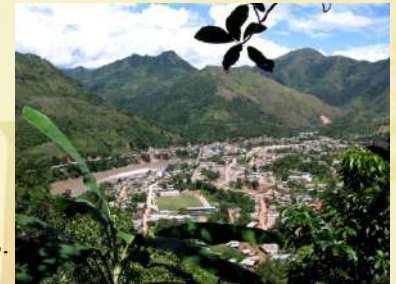

Costa Rica La Pastora Tarrazu

Roasted - Medium or dark. One of our most popular coffees, this is a washed coffee.

Cupping Notes - Chocolate, roasted marshmallow, cherry, vanilla; syrupy and very clean, sweet lingering aftertaste.

About - La Pastora Tarrazú is produced by Coopetarrazu, a cooperative that was founded in 1960 and now has over 4,000 members. In 2004, Coopetarrazu went through an organizational transformation bringing five guiding principles for the cooperative: solidarity, transparency, sustainability, quality, and service. The organization's significant efforts to fundamentally change the way their community members consider and treat the environment has had incredible outcomes for farmers and their children. Fair Trade USA recognizes COOPETARRAZU for their profound commitment to conserving the health of the environment, managing waste, and their conscious consumption of natural resources. Members also have access to low interest loans and healthcare. Coopetarrazu strives to serve the community through environmental protection initiatives and migrant worker support programs.

Guatemala San Juan Sactepezquez

Roasted - Medium or as an Italian. This washed coffee is very complex and layered.

Cupping Notes - Herbal, milk chocolate, butterscotch, and orange overtones. Silky and creamy, high acidity, sweet, juicy lingering aftertaste.

About - Hailing from the Alotenanago region, these farmers are focused solely on quality from beginning to end. The small producers take care to only pick the ripest cherries by hand, and are careful not to mix in any green or unripe cherries. The coffee is promptly delivered in cherry to a small wet mill in Alotenanago. The wet mill's focus on quality does not wane. Once the coffee is in parchment, it is then cleaned by hand. This is regarded as an artisanal procedure and only small quantities are processed, producing a high quality, pronounced cup.

El Salvador HG EP

Roasted - Light or medium. This is a washed coffee.

Cupping Notes - Extremely clean, composed, smooth body, mild and sweet acidity, light chocolate notes, beautifully balanced.

About - The Ciudad Barrios cooperative was founded in 1972, in the hills of the Cacahuatique Mountain range of northwestern El Salvador. It was awarded El Salvador's National Environmental Prize in 1998 for its work protecting the local rain forest habitat. The, 1000-member cooperative makes substantial contributions to their community from the profits of their sales to the multinational. They have donated land and building supplies for the Los Gutiérrez Education Center. The cooperative is currently considering new ways to spend its higher incomes to benefit the poorest members of their community.

Central America

Mexico La Laja

Roasted - Medium or dark. This is a washed coffee.

Cupping Notes - Nose is earthy, nutty; sweet/tart. Nutty, pleasant acidity, round body.

About - Finca La Laja is situated in the heart of one of Mexico's biggest coffee producing region. A 500 hectare size Finca located 1100 meters above sea level, La Laja is steeped in tradition and coffee history. Three generations of coffee producers have worked the rich fertile soil and tropical climate the region provides. The name "La Laja" is derived from the stone commonly found in this region of Huatusco.

Panama Finca Camiseta

Roasted - Light or medium. It is fully washed and has a European Preparation, which has an additional hand sorting at the mill.

Cupping Notes - Buttery smooth body, floral and herbal aromatics, a mild acidity, and a salted toffee sweetness.

About - This Panama is a single farmer lot from the Boquette region, near the top of the Baru volcano. In the 1890's Panama saw an influx of immigrants from Arab nations to begin construction of the Canal. One of those immigrants moved to Boquette, changed his name to Domingo Suarez, and began coffee farming in 1920 in search of a better life for his family. The farm has now been in the Suarez family for three generations and is managed by his grandchildren. This coffee is 80% Typica and 20% Caturra.

South America

Brazil Fazenda Santa Mariana

Roasted - Light. This Brazil is from the Sul de Minas region and naturally processed.

Cupping Notes - Hints of dark chocolate, red bell pepper, complex; good body and sweet acidity, long, lingering finish.

About - For over 50 years the Sobrinho family has cultivated coffee on its family property. Today Paulo and Glycia oversee the family business. Fazenda Santa Mariana has 134 hectares of which 65 hectares are dedicated to coffee plantation where they practice the varieties Mundo Novo, Catuai, Icatu, Catucaí, and Bourbon.

Colombian Excelso Valle Del Cauca

Roasted - Medium or as a French. This Colombian is processed using the wet or fully washed method.

Cupping Notes - Hints of raspberry and strawberry, alongside sweet praline, chocolate, and butter; Slight citric acidity and juicy body; Very balanced and lingers sweet.

About - 95% of the coffees produced in Cartago and Sevilla come from farms of 5 hectares or less. Coffee is handpicked, fermented for about 12 hours and then sun dried. Average temperatures in Valle del Cauca range from 19-20 degrees Celsius year-round, with about 12 hours of daylight. Colombian Coffees are known for their great aroma and rich body.

Peru Chanchamyo

Roasted - Medium or dark. This is a washed coffee. Medium-bodied and delicate, with floral and nutty overtones, and a sweet finish.

Cupping Notes - Medium-bodied and delicate, with floral and nutty overtones, and a sweet finish.

About - Chanchamayo Valley produces 40% of Peru's total coffee crop. Smallholder farms produce nearly all of the coffee, which is shade grown at high altitudes.

Africa

Kenya AA Njoga

Roasted - Light or medium. It is a washed coffee.

Cupping Notes - Refined and perfectly balanced. Aroma of brown sugar and sweet fruit, syrupy mouth feel, refined, and wine-like acidity. Palate is dominated by lemon and grapefruit notes, with a sweet finish.

About - In Kirinyaga, the tradition of coffee growing goes back to 1893. Daniel Thiong'o Kamûu planted his first crop of coffee on a three acre plot next to the Njoga River in 1959. Today the farm has expanded to 100 acres.

Malawi AA Inzovu

Roasted - Light or medium.

Cupping Notes - Smooth, creamy bodied, and lively acidity; Complex notes of red wine and warm spices.

About - This is truly a special coffee. It is produced by an award winning estate, Sable Farming. The coffee is grown in 3 areas: Limbe, Zomba Mountain in Namadzi, and the east side of Lake Malawi. The total annual production at Sable Farming is about 1000-1500 MT per year (roughly 16,000 bags.) Raised table racks adjacent to the pulper. The dried parchment is stored for approximately six weeks for conditioning, prior to hulling, grading, and bagging at the Mapanga Dry mill.

Tanzania Peaberry Mutwari

Roasted - Medium.

Cupping Notes - This is a washed coffee. Balanced acidity, medium body. Aromas of toast and cream, flavors of Meyer lemon curd.

About - Mutwari translates to "chief" in multiple Bantu languages. Mutwari coffee comes from 50 farmer groups/individual small holder farmers. It is composed of both CPU (central pulper units-fully washed) and HP (home processed-home washed) coffee throughout the Mbozi, Mbeya Rural, Ileje, and Rungwe districts of Mbeya Region. Over 60,000 farmers produce coffee in the Mbeya region.

Africa

Ethiopia Yirgacheffe Kochere 'Banko Gutiti'

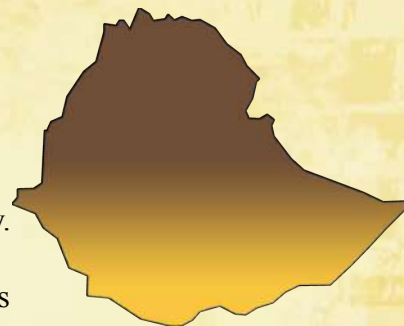

Roasted - Light or dark. It is a washed coffee.

Cupping Notes - Black tea, citrus, vanilla, extremely silky and refined.

Lavender, lemon, very clean and pleasant, lively acidity and creamy body.

About - This coffee is contributed by smallholder farms. It hails from the Banko Gutiti area of the Kochere Woreda in Yirgacheffe. Coffee from this area is known for its beautiful floral character and is usually very complex in acidity. We all know that Ethiopian coffee is some of the best in the world, and this is a fine example of that. This coffee is fully washed at the Alemu Washing Station and dried for 18 to 20 days on drying beds.

Approximately 650 small farmers contribute to the washing stations.

Ethiopia Harrar

Roasted - Light or medium. This is a natural, sun dried coffee.

Cupping Notes - Slight berry aroma. High acidity, cane sugar, slight earthiness.

About - About 23 small farm holders from the Gololcha district cooperatively produce the Harrar. This is a natural processed coffee that comes to you from Gololcha's Tired Coffee Producer's Cooperative Association (TCPCA) and is processed at their Samson Girma Dry Mill. "Tired" literally means 'best effort' or 'hard struggle'. The coop community which is centered in the village (or "kebele") of Chanco has the incredible benefit of a nearby natural spring from which to draw clean and reliable drinking water. Under the guidance of the co-op and community leader, Ababayehu, and as part of an overall sustainable farming program, recycled pulp from the mill is used as compost for local coffee trees. Pruning and stumping of the coffee trees is also an on going process to ensure the best yields and cup qualities. Member farm range in size from about 2-3 acres. Chanco is the main administrative hub of the Gololcha woreda, which is part of the Arsi Zone, home to the Great Rift Valley, Mount Chilalo and about a dozen farming cooperatives. Within the Arsi Zone, Gololcha is bordered by the woredas of Amigna, Chole and Aseko, which are all part of the much larger Oromia region, According to governmental surveys only about 20% of the land in Gololcha is readily farmable. Coffee production remains an important part of industry in Gololcha as a whole.

Ethiopia Sidamo

Roasted - Light or medium. It is a washed coffee and has a Organic Rain Forest Alliance certification.

Cupping Notes - Excellent sweetness and mouthfeel, candied ginger, sweet spices, honey, orange peel.

About - This coffee grows in the Oromia region, one of Ethiopia's largest regions. The farm is located in the Guji zone, the southern part of Oromia that borders on the Sidama and Gedeo zones. The farm started to produce organic coffees in 2001 and works closely together with medium-sized outgrowers who are specialized in this highland forest coffee. The enterprise has 640 hectares with its own nursery sites to grow coffee seedlings. There are currently twelve permanent qualified members of staff with more than ten years practical experience in coffee production, processing, clearing and marketing. During harvest, they have more than 300 coffee pickers harvesting coffee. About 150 of them supply coffee individually to the wet mill. There are many gold mines in the area, so the coffee fields are literally full of holes where people have been digging for gold. This makes walking between the coffee trees challenging.

Indonesia

India Moonsooned Malabar AA

Roasted - Dark but because of its moonsooned process it appears as a medium.

Cupping Notes - Full-bodied, earthy, tobacco, and spice notes.

About - During monsoon season, natural processed coffee beans are exposed in layers of 4-6 inch thickness to moisture-laden Monsoon winds in a brick or concrete-floored warehouse. They do this to reenact a cargo shipment that was soaked by hundreds of inches of rain from India to Europe during the monsoon season. The result is a coffee that is greatly altered by the rains. Most of the acid is washed away but the earthy flavors that remain are accentuated by musty tones and smooth body.

Papau New Guinea A/X Morobe Province

Roasted - Light or medium.

Cupping Notes - Plum/stone fruit, tropical fruit, cinnamon French toast; creamy with a lemony acidity and slightly spicy chocolate finish.

About - We are pleased to offer this delicious organic A/X from North east New Guinea. Produced by small farmers at the village level. It receives ample sunshine and rainfall to produce a smooth coffee of medium acidity and body with great flavor. This coffee is washed and sun-dried, undergoing processing at Niugini Coffee, Tea & Spice Dry Mills.

Sulawesi Toraja

Roasted - Medium and is wet hulled and dried in the sun.

Cupping Notes - Sweet and spicy, well-balanced with undertones of ripe fruit and dark chocolate. Full-bodied, rich and unmistakably Sulawesi.

About - Sulawesi Toraja coffee is grown at relatively high altitudes on the island of Sulawesi, which was formerly called Celebes (the Dutch colonial name), located in the middle of the Indonesia's Malay archipelago. For this reason Toraja coffee is also known as Celebes. Processing of Toraja coffee is done by the Giling Basah wet-hull method, which produces chaff-free green coffee beans (milled but not yet roasted) with a distinct dark tint. The semi-dry processing has a significant effect on the character of the brewed coffee. This coffee is sourced from small holder farmers. Toraja village life is like a dreamland illusion with houses that resemble boats and animist rituals called aluk to dolo (the way of the ancestors) that are reminiscent of Santeria.

Sumatra Mandheling Grade 1

Roasted - Medium and dark. This coffee is wet hulled and dried in the sun.

Cupping Notes - Low to medium acidity. Sweet brown sugar, earthy fragrance and aroma, red wine, and herbal. Full body with slightly rustic cup. Lingering chocolate after taste.

About - Sumatra coffees are famous for their peculiar flavor profile, low acidity, thick body, and rustic flavors that can often be described as earthy. Much of the flavor comes from the way Sumatras are processed, the wet-hull method. Coffee in Indonesia is grown on smallholder farms, a family with anywhere between 100 trees to a few hectares of land. Sumatra coffees have not been sold by region, because presumably the regional differences are not that distinct. Rather, the quality of the picking, preparation, and processing of the coffee determines much of the cup character in this coffee. In fact, Sumatras are sold as Mandheling (Mandailing) which is simply the Indonesian ethnic group that was once involved in coffee production. The coffee is scored by defects in the cup, not physical defects of the green coffee. So a fairly ugly-looking green coffee can technically be called Grade 1 Mandheling.

Decaffeinated Coffee

Imack uses the Swiss Water Decaffeinated Company. Swiss Water is an innovative, 100% chemical free decaffeination process removing caffeine for coffee roasters around the world.

Imack Swiss Water Decaf Espresso Blend

Roasted - Medium, but appears very dark due to the Swiss Water Process.

Cupping Notes - Chocolate and caramel flavors with a touch of natural fruit, enough acidity to provide a balance, sweetness riding a long, smooth finish.

About - All the taste without the caffeine, a smooth well-balanced sweet espresso! Imack Coffee Roasters combine the finest Swiss Water Coffees from Brazil, Latin America, and Indonesia to create a delicious espresso without the caffeine that will keep your customers coming back.

Costa Rica Tarrazu, Valle Central

Roasted - Light/medium. It is a Swiss Water decaf and it appears darker than the roast level.

Cupping Notes - Rich body balanced with appropriate acidity, and a bit of toasted marshmallow sweetness up front.

About - The Central Valley is made up of the San José, Heredia, and Alajuela provinces. Its productive structure is influenced by the agro-export model that greatly emphasizes the importance of the cultivation and industrialization of coffee. The altitude of the Central Valley affects the size and hardness of the coffee bean and can influence certain components, in particular the acidity; these elements are very important to the characteristics of Arabica coffee, which offers an aromatic, smooth, and pleasant flavored beverage.

Imack Swiss Water House Decaf

Roasted - Medium. It is a Swiss Water decaf and it appears darker than the roast level.

Cupping Notes - Sweet graham cracker, balanced, pleasant mouthfeel.

About - This is a decaf blend consisting of South American, African, and Indonesian Swiss Water coffees. The gentle water process is used to remove the caffeine content without disrupting much of the volatile compounds that affect flavor and aroma.

Sumatra Swiss Water Decaf

Roasted - Medium. It is a Swiss Water decaf and it appears darker than the roast level.

Cupping Notes - Low to medium acidity. Sweet brown sugar and earthy fragrance and aroma, red wine and herbal. Full body with slightly rustic cup. Lingering chocolate after taste.

About - It is a Mandheling. The Swiss Water® Process uses pure green coffee extract and proprietary carbon technology to remove caffeine from green coffee beans. The beans are first soaked in very hot water and caffeine is leached out of the beans' cellular material to create green coffee extract. The solution is then passed through a carbon filter. They have specified the pore size of the carbon to match the caffeine molecule to ensure only the caffeine is trapped when the caffeine is captured from the green coffee extract. The Swiss Water Process is certified organic and 100% chemical free.

The Ghirardelli Chocolate Company is a manufacturer and marketer of premium chocolate products. Incorporated in 1852, Ghirardelli has the richest heritage of any American chocolate company. Ghirardelli is one of the few companies in America that controls the entire chocolate manufacturing process from cocoa bean to finished product. This control over the manufacturing process combined with Ghirardelli's proprietary bean blend and unique methods of roasting and processing, ensures that you are rewarded with the highest quality and richest products.

AND A BUD

EST.

2004

Two Leaves and a Bud Tea Company

Two Leaves and a Bud is an independent tea company specializing in top quality organic and fairly traded tea. Founded in 2004 in the mountain town of Basalt, Colorado, the company is named for the top two leaves and bud of the tea plant (*Camellia*

Sinensis) plucked by hand to make the world's best tea. Two Leaves offers a 360-degree tea solution that is delicious, beautiful, and profitable.

CAPPUCCINE®

Cappuccine - 3lb Bag - All Cappuccine products available

The Frappe That Started It All Our founder Michael Rubin created the Original Cappuccine Frappe mix in 1991. Not satisfied with cold beverages served in coffeehouses, Michael saw untapped market

potential for a super premium, powdered frappe mix for blenders. His motivation then, as it is now, was to capture the bold coffeehouse flavors of authentic mochas and lattes in a refreshing blended beverage. And the rest is history. Today, these irresistible drinks could not be more popular and Cappuccine is leading the way with innovative flavor discoveries and an uncompromising passion for quality.

THIRD STREET

Third Street Chai Company

Third Street chai concentrates start with whole, organic spices, which they hand-mill in their 100% wind-powered microbrewery in Boulder Colorado. They then steep these spices with organic and Fair Trade Certified teas to produce the freshest, most authentic chai on the market. Their chai is lightly sweetened, with a flavor that is perfectly balanced between spicy and sweet. When they are done brewing, they compost 100% of their ingredients with local organic farmers.

Easy to prepare, simply mix with equal parts milk or milk substitute.

Mystic Masala Spice

A lightly sweetened and perfectly balanced blend of fine tea and aromatic spices.

Honey Vanilla Spice

A richly smooth blend of fine black tea, aromatic spices, wild flower honey and vanilla extract.

Dragon Tongue Ginger

A generously spiced blend of black tea, fiery ginger, and freshly-milled aromatic spices.

Pixie Mate Yerba Mate

Mate is loaded with vitamins and minerals, as well as much higher levels of antioxidants than regular tea or coffee.

64 oz

Oregon Chai

Chai. It starts with a soft "ch" and rhymes with sigh (of contentment, naturally). Because when tea leaf meets clove, cardamom, cinnamon and ginger, it just works on so many levels. Enjoy it hot or iced, morning or evening, summer or winter, alone or with friends, straight up or sweet and creamy.

Oregon Chai fills your cup with all-natural ingredients. You'll be quite happy to know just how easy it is to make yourself a soothing cup of chai and indulge in a few moments of Me Time.

David Rio chooses superior ingredients from around the world to blend into a award-winning chai. They make their chai with freshly ground organic spices. Real spices, like cinnamon, clove, cardamom, nutmeg and ginger, are just a few they use to capture chai's traditional, but yet dynamic flavors. The aroma of their organic spices are released just as you pour the hot water or milk over any David Rio chai mix. The distinctive chai fragrance and flavors fully bloom into a well-balanced chai right in your cup.

Every David Rio chai product is free from hydrogenated oils, trans fats and gluten. The quality and mixture of spices and ingredients assure the crisp, clean flavor of our chai, boasting its depth in every sip. David Rio products are also very versatile and can be used to make baked goods and other delicacies.

Lollicup Bubble (Boba) Tea

What is... BOBA?

BOBA, also known as "tapioca balls" or "black pearls," are derived from the starch of the cassava root. When prepared perfectly, boba becomes sweet, chewy and translucent with a gummi bear-like texture about 1/4 of an inch in diameter.

PLEASE DRINK CAREFULLY TO AVOID CHOKING.

Chocolate Covered Coffee Beans

Chocolate Espresso Beans, a signature Dilettante Chocolates confection, are one of our most popular items. Dilettante Chocolates takes their own Hapsburg roasted coffee beans and double coats them with thick layers of milk, dark, and white chocolate. Enjoy crunchy whole coffee bean centers wrapped in smooth, soft gourmet chocolate. The bitter coffee notes are deliciously complemented by the taste of rich, sweet chocolate. This bittersweet treat will delight any coffee and chocolate connoisseur.

TODDY®

cold brewed. simply better.™

Toddy Cold Brewed System

For nearly 50 years, Toddy has delighted baristas, food critics, and regular folks alike for its smooth, delicious flavor. By extracting the bitter acids and oils that other brewing methods leave behind, the Toddy Cold Brew System produces a smooth, low acid concentrate ideal for hot or iced coffee or tea. Acclaimed in the pages of The New York Times, U.S. News & World Report, Time, and more, we invite you to enjoy the benefits of cold brew coffee yourself. We are confident that you will join the countless others who call Toddy the best coffee maker ever.

Imack stocks Bunn quality filters but they can be used in any machine!

Hario Filters #2, Natural Paper - **100/pkg**

Other sizes available!

Water Filters

Great coffee begins with clean filtered water! Most filters have a life of 6 months or 1250 gallons. Ignored, filters will result in costly machine repairs and poor-tasting beverages. Imack Coffee offers a variety of easy to change Omnipure filter and water softeners.

Espresso Cleaners

Urnex products help to ensure that you are serving the best tasting beverages possible. A dirty machine in any environment will affect the taste of your coffee or tea. Whether you are a consumer, distributor, online retailer, c-store and food service provider, roaster, office coffee supplier or retailer – Urnex has the right cleaning product for you.
